

Description of the Diagram:

The diagram is titled **Impact Pathway** and represents a step-by-step process divided into six sections: **Problem/Context**, **Activity**, **Output**, **Intermediate Outcome**, **Outcome**, and **Impact**. It visually illustrates how addressing an identified problem can lead to improved outcomes and impact.

1. **Problem/Context:** The starting point identifies the issue: *"Lack of investment in capacity building and business development has impeded the promotion of millet enterprises."*
2. **Activity:** The next step highlights the action taken: *"Self-Help Groups (SHGs) are formed, focusing on capacity building to promote millet processing and value addition."*
3. **Output:** The immediate results of the activity include:
 - *Low-cost credit,*
 - *Drudgery reduction,*
 - *Access to improved technology, skills, and business practices, and*
 - *Improved nutrient intake through increased consumption.*
4. **Intermediate Outcome:** These outputs lead to:
 - *Higher business profitability, including investment and productivity,*
 - *Diversification of livelihoods,*
 - *Increased economic participation, and*
 - *Improved use of women's time.*
5. **Outcome:** Further effects include:
 - *Improved women's income and consumption,*
 - *Enhanced subjective welfare,*
 - *Women empowerment,*
 - *Better nutrition for women and children, and*
 - *Improved child education.*
6. **Impact:** The ultimate goal is described as *"Improved welfare, including food security, nutrition, and empowerment."*

At the bottom of the diagram, the text **Monitoring and Evaluation Strategy** is included, indicating a framework to assess progress and outcomes.
